Multi-State Information
Sharing & Analysis Center®

2021 Kids Safe Online Activity Book — Cybersecurity Champions

The Multi-State Information Sharing and Analysis Center® (MS-ISAC®), has been designated by the U.S. Department of Homeland Security's Cybersecurity & Infrastructure Security Agency (CISA) as the key resource for cyber threat prevention, protection, response, and recovery for all U.S. State, Local, Tribal, and Territorial governments.

Every year, the MS-ISAC conducts a National Cybersecurity Awareness Poster Contest to encourage young people to use the internet safely. The contest is open to all K-12 students in all 50 states, the District of Columbia, U.S. territories, U.S. tribes and U.S. military installations worldwide.

This year, as the COVID-19 pandemic moved us all towards the digital environment, the MS-ISAC embraced that shift. Rather than the traditional calendar that features the 13 poster contest winners, we found a new way to distribute educational and interactive resources and showcase the winning artwork.

The result is this cyber safety activity book that includes cybersecurity-related crossword puzzles, word searches, word scrambles, coloring pages, and the poster contest artwork. This activity book's artwork was developed by grade K-12 students who participated in the 2020/2021 MS-ISAC National Cybersecurity Awareness Poster Contest. The 13 winning submissions illustrate the safe use of the internet and mobile devices through password protection, keeping devices and software up-to-date, protecting personal information, and other important topics.

The 2021 Kids Safe Online poster contest winners* are:

- **Alyssa** 5th Grade, New York – National Winner
- **Aniya** 6th Grade, New Jersey
- **Avni** 6th Grade, Arizona
- **Bryce** 9th Grade, Texas
- **Haley** 2nd Grade, New York
- **Jessalyn** 11th Grade, New Jersey
- **Luana** 11th Grade, Texas
- **Melia** 12th Grade, Virginia
- **Nicole** 12th Grade, New York
- **Sahaj** 1st Grade, New York
- **Sanjay** 8th Grade, New Jersey
- **Theodora** 7th Grade, New York
- **Whitney** 5th Grade, Iowa

With kids spending more waking hours online than ever before, cybersecurity is of the utmost importance. The contest is a fun, yet very impactful way that our kids can educate not only their peers, but everyone, on the importance of online safety. Thanks to all the students who contributed submissions, and congratulations to our winners!

Carlos Kizzee

MS-ISAC Vice President
Stakeholder Engagement

The next Poster Contest will be open September 24, 2021 - January 21, 2022. Winners will be featured in the 2022 MS-ISAC Kids Safe Online Activity Book — Cybersecurity Champions! Please visit <https://www.cisecurity.org/ms-isac/ms-isac-toolkit/> for more information on the 2021-2022 MS-ISAC National Cybersecurity Awareness Poster Contest guidelines. For questions, please email us at contest@cisecurity.org.

We appreciate the continued support from our integral partners.

Know Your Cybersecurity Terms!

Adware	Programs that display an advertisement on the screen, and are often installed without the user realizing.
Cat-fishing	Luring someone into a relationship, either through a chatroom or social media website using a fake identity.
Clickbait	A link that entices you to click on it. Clickbait will usually use images or phrases to draw the user's attention.
Cookie	You can't eat these BUT they keep track of your user preferences.
Cyberbully	Person who hurts someone else online on purpose.
Cybersecurity	A technique or software used to protect computers and prevent online crime.
Data	Information that is stored on a device or computer.
Download	Save a file from the internet to your computer.
Firewall	A program that is installed to block viruses.
Hacker	Someone who accesses unauthorized computer data.
Hardware	The physical components of a computer system, like the wiring, monitor, laptop, or disc drive.
Identity Theft	A crime that involves someone obtaining personal information such as a credit card, social security number, or bank account number from someone else in order to steal money.
Internet	A giant collection of computer networks that connects people and information all over the world.
Malware	Short for "malicious software". Programs that damage computers, steal personal information or expose a computer to further damage by hackers.
Netiquette	The best way to behave online.
Network	Multiple computers that are connected to one another.

Know Your Cybersecurity Terms!

continued

Phishing	An attempt to trick people into visiting malicious websites and share their personal information.
-----------------	---

Piracy	The illegal duplication or use of copyrighted material.
---------------	---

Pop-up	An unsolicited advertisement.
---------------	-------------------------------

Privacy settings	The part of a social networking site that allows you to control who sees information about you.
-------------------------	---

SMS	Short message service. The true term for a text message.
------------	--

Search Engine	A web tool that enables users to locate info on the world wide web, such as Google Chrome.
----------------------	--

Server	Programs that manage a website and send web pages to the user's browser when it is asked to do so.
---------------	--

Social Media	A social network that is used to share personal images and information.
---------------------	---

Software	Programs that run on your computer.
-----------------	-------------------------------------

Spam	Another term for "junk email", usually an email message sent to a large number of people without their consent and promotes a product or service.
-------------	---

Streaming	Using media without downloading it. Example is listening to music on YouTube.
------------------	---

Surfing	Browsing multiple websites on the internet.
----------------	---

Troll	Someone who posts upsetting messages or images on social media for the sole purpose of gaining an emotional reaction from the viewers.
--------------	--

Upload	Sending information from one computer to another.
---------------	---

Virus	Software that can delete files, steal data, or take over someone else's computer remotely.
--------------	--

World Wide Web (www or web)	A system on the internet that allows you to browse through a variety of linked resources using typed commands or clicking on links.
------------------------------------	---

Don't do this.

Don't give your private info to someone you just met. They may be dangerous.

WINNER

✓ Cyber Tip: Stop That Chat!

If you receive a text from someone you don't know, don't respond – ignore it! It could be from someone with bad intentions. Never send anyone information they don't need to know, such as where you live. And never take or send photos that you wouldn't want the world to see! Once you send it, you can never get it back.

Word Scramble

Instructions:

Can you unscramble these cybersecurity terms?

Hints:

Answer:

LYLBBUCEYR

Person who hurts someone else online on purpose.

DNWAOLOD

Save a file from the internet to your computer.

SVIRU

You don't want your computer or phone to catch this cold! It can delete files and steal your data.

SHPGINHI

Much like a worm on a hook to trick a fish – these mean email types are created to trick people into visiting malicious websites.

AHRREWDA

All the techy stuff in your home and in your hand. They are the physical components of a computer system, like the wiring, monitor, laptop, or disc drive.

IF YOU AREN'T CAREFUL
WITH YOUR BROWSER
COOKIES, IT'S EASY FOR
THEM TO FALL INTO THE
HANDS OF HUNGRY HACKERS.

ARE YOU CYBER-SECURE?

PROTECT YOURSELF BY:

- CLEARING YOUR COOKIES REGULARLY
- NOT CLICKING ON UNUSUALLY LARGE OR COMPLEX LINKS
- NOT CONNECTING TO UNSAFE PUBLIC NETWORKS
- ENSURE THAT THE SITE YOU ARE ON IS SECURE AND USES HTTPS.

Cyber Tip: Passwords

Keep your passwords private!

Your password is your secret weapon to keep your information safe. Use passwords that are hard to guess. Even better, use a "passphrase" instead! It will be longer, so more secure, and easier to remember too. Mix numbers with letters, and use unique (wrong) spellings, like this: Myd0g1zbrown&wite!

Can you make it to
the other side?

✓ Cyber Tip: Online Safety

Stranger Danger!

Sometimes, bad people can pretend to be someone else to get you to chat with them. A grown-up may pretend to be a teenager, for example. So, if you don't know them, don't chat with them! And never send them information about you or your family.

Answer key shown on page 26

Cyber Tip: Whack That Hack!

Hackers use computers to steal information from other people, to get money, or to damage computers that belong to people, businesses, or governments. Hacking is not only wrong, it's against the law. Ask your parents to use anti-virus software to protect your home network, and never download files from suspicious sites. Those files could contain "malware" (bad software) that could cause you all kinds of trouble!

Word Scramble

Instructions:

Can you unscramble these cybersecurity terms?

Hints:

Answer:

L A F W L R I E

A really hot item for security – this is a program that is installed to block viruses.

R L O L T

Someone who posts upsetting messages or images on a social media website, comments section, or chat for the sole purpose of hurting someone's feelings.

R K C A H E

Someone who accesses unauthorized computer data.

D U O P L A

Sending information from one computer to another ie. a video you filmed on your phone and then posted to TikTok

E A W A D R

Beware of those pop-ups! These are programs that display an advertisement on the screen, and are often installed without the user realizing.

Be Careful When Sharing

★ Be mindful about what you share and who you share it with.

★ Avoid people who overshare and don't become an over sharer.

Can you make it to the center?

Send Secret Messages Like a Spy!

Encryption is a way to disguise text in order to send secret messages.

A very simple technique is to replace the alphabet with the letters in reverse order:

a	b	c	d	e	f	g	h	i	j	k	l	m	n	o	p	q	r	s	t	u	v	w	x	y	z
z	y	x	w	v	u	t	s	r	q	p	o	n	m	l	k	j	i	h	g	f	e	d	c	b	a

For example, if you spell the word "CAT" with this code (also called a cipher), it would be "XZG".

C = X

A = Z

T = G

Can you decode messages like a spy? What are these words?

WLT =

HZUV =

HVXIVG =

PASSWORD SAFETY

DO CREATE LONGER PASSWORDS

Try for around 16 characters. However, make sure it's not so long that you forget it.

DO CHANGE PASSWORDS ON A REGULAR BASIS

You should change your password frequently. Especially for things like banking info, this may mean every two months.

DO USE TWO-FACTOR AUTHENTICATION

If a hacker did steal your password, it's an extra layer of protection preventing unwanted access to your accounts.

DON'T USE PERSONAL INFORMATION

i.e. your name, a family member's name, pet, address, phone number, birthday. They're often publicly available and easily accessible.

DON'T REUSE PASSWORDS

If the hacker cracks just one password, they'll gain access to all your other accounts, and we don't want that.

DON'T USE REAL WORDS

Instead, try special characters like @, \$, %, or ! to increase password complexity.

SOCIAL MEDIA

Cyber Tip:

Don't Let Social Media Be Anti-Social!

Just because you can post anything about yourself on a social media site doesn't mean you should. Keep your networks private and don't accept invitations from strangers. Don't post information about yourself that could put your or your family at risk. For example, don't post pictures of where you live, or tell people that you're home alone or away on vacation. Bad people may get access to this information.

Leave social media altogether if it makes you unhappy. Remember, social media can be fun, but getting together with real friends in person is even better!
